

Statement on the EU Regulation (EC) No 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

Article 33 - Duty to communicate information on substances of very high concern (SVHC). Annex XVII – Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles.

Date: 16.03.2026

Note: Where applicable, this statement shall be revised in line with the REACH updates issued by ECHA (European Chemicals Agency)

In relation to the requirements of the regulation mentioned above, we hereby declare:

- Referring to the most recent SVHC update release by ECHA ref ECHA/NR/26/06 on 04.02.2026, we confirm that the articles supplied by IBP Group are in compliance with the EU regulation (EC) 1907/2006 REACH. This information is based on the declaration and information received from our suppliers.

- IBP Group is a supplier of finished articles which due to technical reasons may contain the notifiable SVHC substance lead (EC: 231-100-4, CAS: 7439-92-1) in a mass concentration of more than 0.1% as an alloy element. This statement is applicable to all IBP Group product ranges such as pipe fittings and valves that are made of brass and bronze (red brass).
- Since lead is firmly bound in our products as an alloy element, thus no exposure is expected. Therefore, no additional information on the safety of use or a special marking is required.

- We have no indication that the substance mentioned above may impair the safe use of our products for the intended purpose. However, please follow the instructions for use of the particular product.
